

Marco Napoli

marco.n@pixolini.com

<http://pixolini.com>

[@JediPixels](#)

Identified for developing the first Graphical Mortgage Banking Industry Software for Windows. Strong proven record in developing visually elegant and simple to use systems. A diverse mix of industries including hospitality, banking, health care, real estate, education, trucking, entertainment and horizontal markets.

Skills

- IOS, macOS, Swift
- Flutter, Dart, Vue
- Firebase, Firestore
- WordPress, PHP
- HTML, Bootstrap
- Udemy Instructor
- ASP.NET Core
- C#, UWP, Node.js
- MS SQL Server

Experience

1996 – PRESENT

Consulting / Pixolini, Inc., IdeaBlocks Inc., Avanti Tech Inc.

Develop and Architect mobile applications in iOS, Web, Mac, and Windows. Backend web services, MS SQL, NoSQL, and Firebase.

- Author of Beginning Flutter – ‘A Hands On Guide To App Development.’ Publisher Wrox.
- Developed for a client (multi-million dollar company) that sold hospitality software for mobile, desktop, and web. The main products focus was hotel sales, catering, workspace, guest service, and maintenance software. The products synced via cloud servers using MS SQL Server with encryption applied to sensitive data. A small list of his client’s customers was Hyatt Place and Summerfield, Hilton Hotel, Holiday Inn, Hampton Inn, Marriott, Best Western, Radisson Hotel, Sheraton Hotels, Howard Johnson, Embassy Suites, and many more.
- iOS Universal Apps using technologies like UIKit, MapKit, MessageUI, CloudKit, NotificationCenter, Core Data, SQLite, Core Location, StoreKit, UserNotifications, Media Player, AVPlayer, AVKit, WebKit and WatchKit . Backend Database using Firebase NoSQL with offline sync, Authentication, Cloud Storage, Cloud Functions and Hosting.
- Serve as a Computer Consultant to companies and individuals.
- Experienced in product development/management for architecting new projects, reengineering existing products. Manage projects from product design, code implementation, alpha, beta testing, distribution, demo, bug reporting/fixing and technical support.
- Internet/web development. Projects include data access from client computers accessing a central database through web access using ASP.NET Web Forms and MS SQL Server.

1995 – 1996

Acquired by Servantis / Servantis Systems, Inc. / Checkfree

Served in this contract role as part of the sale of my company M.L.N. Enterprises to Servantis Systems. Worked in development and presentation of Mortgage Banking software.

Education

1982-1985

Architecture & Engineering / University of Miami

1980-1982

Architecture & Engineering / Florida Atlantic University

Activities

Achieved recognition on channel 12 news (NBC), in Palm Beach County, Florida, for designing simple to use software products, by taking advantage of the latest technology.

Featured on a half hour television special, regarding creative ways of financing real estate.

Projects Website Links

Current Projects that I have developed from ground zero to release using Flutter, Firebase, iOS, macOS, Swift, Vue, Angular, Node.js, HTML, Bootstrap and UWP.
